

ONLINE SOUND SENSITIVITY STUDY

.....

We are recruiting **autistic adults** who have specific **issues with sound sensitivity** to test new technology at home to help manage challenges with sounds.

About the Study:

- You will be asked to complete online questionnaires about your experiences with sound sensitivity
- We will deliver sanitized materials to you, including a tablet and headphones
- Over Zoom, we will play certain sounds at different volumes to determine your comfort level with these sounds
- We will then use our new technology to help with sound sensitivity and ask you for your input
- This will take approximately 1.5 hours
- We are offering \$20/hour or portion thereof

Who Can Participate?

- 1 Adults (at least 19 years old) diagnosed with autism
- 2 Experience over-reactivity to sounds in general **and/or** certain types of sounds
- 3 Live in the Lower Mainland of B.C., have access to internet in a private location, and are willing to be video recorded over Zoom

If you are interested in participating or would like more information, please contact Troy Boucher at tboucher@sfu.ca
